# Permanent Make-up Eyebrows by Kally Moorhouse

*We know that changes to your eyebrows during or after cancer treatment can feel very personal. This appointment is designed to give you natural-looking, carefully planned eyebrows in a calm and supportive setting.*

## Treatment cost & booking

**Total Cost £560**

| | |
|---|---|
| **Cost per treatment** *(2 appointments are required to complete the treatment)* | **£280** |
| **Booking fee** | **£100** |
| **Remaining balance** | **£180** |

**The £100 booking fee secures your appointment.** The remaining £180 can be paid on the day of treatment, or in advance using the payment option in your booking confirmation link. Please note that all permanent make-up treatments are delivered over 'two' appointments. You will need two bookings, each 4/8 weeks apart.

## Your telephone consultation

**Carly, Kally's assistant, will contact you to book your appointment.** She will talk you through the basics, answer general questions and make sure you know what to expect before attending Future Dreams House.

**On the day, Kally will go through everything in detail.** This includes discussing your preferred eyebrow style, looking at your face and any existing brow hair, choosing colour, drawing and agreeing on the shape, and creating a treatment plan tailored to you.

## Frequently asked questions

**How do you choose the colour?**

Kally will select a pigment by looking at your natural colouring, skin tone, hair colour and any brow hair that remains. The aim is a believable result that suits you, rather than choosing one standard brown.

**How many treatments are needed?**

Permanent make-up eyebrows are normally a two-stage process. The first appointment creates the shape and initial colour. A follow-up session is required, once healed so Kally can assess retention and refine the result.

**What if I am due to start chemotherapy?**

Please tell Carly when your chemotherapy is due to begin. Timing is important, as treatment does need to be completed before chemotherapy starts. Kally will advise on suitability and, where appropriate, we may ask you to confirm timing with your oncology team.

**What if I have finished chemotherapy?**

Please tell us when your final chemotherapy treatment was and whether you are still receiving any other cancer treatment or medication. Healing and immunity vary from person to person, so Kally will assess suitability and may ask for confirmation from your medical team if needed. The standard rule is to have finished Chemotherapy for 5 weeks. This allows enough time for your body's natural immunity to return.

**What if I have no eyebrow hairs at all?**

That is absolutely fine. Kally can design your brows from the beginning using your facial proportions, bone structure, photographs if helpful, and your own preferences. The shape is drawn on first and agreed with you before any tattooing begins.

**Does it hurt?**

Most clients find the treatment very manageable. A topical anaesthetic is used to help keep you comfortable. You may feel light scratching, vibration or pressure, and Kally will check your comfort throughout.

**Is this microblading?**

No. This is permanent make-up (cosmetic tattooing), not traditional microblading. Kally uses specialist permanent make-up techniques to create soft, realistic hairstrokes and/or shading, depending on what will give the most natural result for you.

**Appointment Timing**

Your first appointment will take around 2 hours. At Future Dreams, we are limited in how many people we can treat per day. This means we ask everyone to arrive on time for their treatment. Any delay may mean treatment needs to be postponed.

## A little note before your appointment

Please tell us about any current cancer treatment, medication, recent surgery, infection or skin changes around the brow area. **Your wellbeing comes first, and if there is any doubt about whether treatment is appropriate at that time, we may ask you to speak with your oncology or medical team before going ahead.**

**Your brows will be planned with you, not for you.**

There is time on the day to ask questions, talk through your concerns and agree every part of the design before treatment begins.
